6. step 6:

The information of Programming the time conditions for service:

Ignition on.

There are three service parameters that can be programmed. This parameters is used to set the number of months of the vehicle may be driven before the service reminder indicator (SRI) lights.

The following values may be selected: 6 months, 12 months.

Read off the parameter that is programmed.

To change the service parameter, mark the desired value in the list and start programming.

7. step 7:

Select Ok then it will send command to ECU, and display information like this:

Note! If not support information displayed, it will exit this function.

If support, display information like this:

The first line, Programmed Value 12 month, is the present programmed value for your vehicle, if you want to change this value, you can select the desired value in the list:

F1: Time condition for service = 6 month

F2: Time condition for service = 12 month

For example: you want to change this value to 6 month, please select F1 and it will start programming. When programming finish, the Programmed Value will change to 6 month as the following figure, it means that the programming succeeds.

Note! Maybe some vehicles can not be programmed. (Programmed Value does not change

when programming)
